ISO 9001 CERTIFIED FOR PRECISION ULTRASONIC SUPPLY CHAIN CLEANING

#CPCgreen

Congratulations to our members Contents Processing Centre (CPC) for their ISO 9001 certification

Contents Processing Centre (CPC) has been serving Windsor and Essex County for over 10 years, restoring personal and business property using environmentally friendly cleaning techniques.

Part of their continued success in customer service, quality cleaning results and reputation as a leader in contents restoration, can be attributed to the process framework that they work within. Efficiently documenting, tracking and verifying items throughout the entire process allows CPC to operate as a production facility supported by the content evaluation specialists working in the field.

CPC has naturally progressed into the implementation of a Quality Management System (QMS) in accordance to the ISO9001 standard verified by NSF. The accreditation guarantees trust in quality assurance, continued improvement and on time delivery.

Our QMS system supports manufacturers in automotive supply chain ultrasonic cleaning using environmentally responsible techniques.

Contents Processing Centre is versatile in our cleaning capabilities and will develop and implement specific process to meet the needs of our clients. Quote requests can be submitted through our [website](#) or parts can be submitted for testing at our facility.

CPC highlights our eco-initiatives by hosting an annual Earth Day Event which is open to the public showcasing many of the local green businesses. Information is available on our [website](#); if you are interested in joining our Green Networking Group or participating in our Earth Day event.

How does your company rethink recycling?

Andrea Descargar of Green City Plastics Inc. & Ecovana

As the demand in production increases, so does the increase in costly disposal fees to haul plastics waste from many automotive manufacturers, and tool and mold companies. Most companies do not rethink recycling, and the next life cycle of their plastics waste.

Green City Plastics Inc. is a local plastic reprocessing company, developing zero waste initiative programs for local manufacturers. We provide cost effective plastic waste solutions, reprocess material at our facility, monthly data waste reports, and educate the companies on how to rethink recycling.

Added value

WE'RE NOT JUST ANOTHER RECYCLER

Company waste management training

Competitive pricing for plastics waste material & savings

Annual Waste Audits & Monthly Reports

Company recognition through media & awards

Non-disclosure agreements & Certificate of destruction for materials

Rethink recycling with Green City Plastics Inc. Let our team help your company towards zero waste.

For more information, or to set up a plastics waste evaluation, please contact Andrea Descargar at:

andrea@greencityplastics.com or call (519)965-2874.

Design the Vehicle of the Future!

The WindsorEssex Economic Development Corporation (WE EDC) is developing a marketing campaign that communicates to the world that the Windsor-Essex Region is Canada's "Automobility" Capital.

To help kickstart WE EDC's marketing campaign, WE EDC is seeking community input by launching a **student contest to design the "vehicle of the future"**. The selected image will serve prominently in WE EDC's marketing campaign that will be featured at the 2020 North American International Auto Show in Detroit, Michigan.

It is highly recommended that the design be a vector-based graphic (example, .AI, .EPS or .SVG).
